WORK & EXPERIENCE

Senior AI/ML Engineer / Team Lead, PSYBERQ 03/2025 – Present | Remote

- Leading a team of 6 engineers building and deploying Generative AI solutions for cybersecurity threat detection and anomaly prevention, achieving enhanced real-time intrusion detection capabilities.
- Generative AI Development: Built and deployed production-ready VAEs, GANs, and Transformer models for cybersecurity anomaly detection using PyTorch and TensorFlow
- LLM Engineering: Deployed and fine-tuned LLMs in both cloud (online) and on-premise/air-gapped (offline) environments for sensitive cybersecurity workloads and data-sovereignty requirements
- Explainable AI: Implemented model explainability with SHAP and LIME for intrusion detection models, enabling analyst-readable justifications for flagged threats and supporting compliance and audit requirements
- Online Learning: Designed online learning pipelines that adapt models to novel attack patterns without full retraining, reducing model drift in production
- MLOps & Cloud Infrastructure: Implemented robust MLOps workflows using Docker, AWS (ECS, S3, Lambda, EC2), and ONNX for model optimization and deployment

AI/ML Software Engineer, Mind Lens Worldwide Pte Ltd 12/2024 – 03/2025

- Designed and deployed AI/ML solutions integrating Django, Streamlit, YOLO, and InsightFace for computer vision and interactive web applications.
- Developed and maintained RESTful APIs for machine learning models, ensuring robust backend integration and end-to-end software delivery.
- Conducted thorough API testing and validation using Postman, improving system reliability and performance.

AI Robotics Trainer, STEMpedia 12/2023 – 09/2024 | Ahmedabad

- Designed and integrated AI & machine learning modules into the PictoBlox platform, leveraging tools like TensorFlow and computer vision to introduce students to core data science concepts, resulting in a 30% increase in user engagement and comprehension.
- Engineered customized instructional content and hands-on workshops that received outstanding feedback, increasing participant interest by 30% and driving higher course completion rates

Python Data Science Developer, Sai Info Solutions 04/2023 – 11/2023 | Nashik

- Neural Network Development: Architected and implemented CNN, RNN, and deep learning models using TensorFlow and Keras for image classification, natural language processing, and predictive analytics

- Model Optimization: Enhanced machine learning performance through advanced hyperparameter tuning (Grid Search, Random Search), achieving 15–20% accuracy improvements
- Full-Stack Development: Built interactive web applications using Flask framework, integrating Python backend with responsive front-end for data visualization and user interfaces

FREELANCE AI & MACHINE LEARNING CONSULTANT

Property Valuation & Market Intelligence Engine

Python, XGBoost/LightGBM, geospatial analysis, transaction data plus location features.

- Trained gradient-boosted regressors on [N]K+ historical transactions, achieving [X]% MAPE against actual sale prices
- Engineered geospatial features (distance to metro, beach, schools, community grade) and time-series adjustments for market trend drift

Building Energy Forecasting & Cooling Optimization System

Python, LSTM/Temporal Fusion Transformer, time-series forecasting, MLOps, Docker

- Built multi-horizon load forecasting models on [dataset] incorporating temperature, humidity, and occupancy, reaching [X]% MAPE at 24-hour horizon
- Developed an optimization layer recommending pre-cooling schedules, cutting simulated peak-hour consumption by [X]%

SKILLS

- | | | |
|--|-------------------------------|-------------------------------------|
| • LLMs (Fine-tuning & On-Premise Deployment) | • Explainable AI (SHAP, LIME) | • Online Learning |
| • GANs | • VAEs | • Multi-Agent Architectures |
| • Hugging Face Transformers | • LangChain | • PyTorch |
| • TensorFlow | • Neural Networks | • ClickHouse |
| • MLOps | • Docker | • RESTful APIs |
| • Hyperparameter Tuning | • Computer Vision | • Natural Language Processing (NLP) |

EDUCATION

Master's of Computer Application (M.C.A), K.K Wagh College, Nasik

2023

Bachelor's of Computer Application (B.C.A), K.K Wagh College, Nasik

2021
